

## IFG - Recycled PA

IFG rPA6-fibres are melt-spun and specially designed for nonwoven floor coverings, but also excel in automotive applications. IFG rPA6-fibers show the same properties as standard IFG PA6-fibers and include outstanding abrasion resistance, good resilience, excellent adhesion to latex, good chemical resistance and good dye-ability and printing options. IFG colour technicians can provide a wide range of customised colours and shades, including black and white fibres. IFG have an in-house colour department which creates shades in close cooperation with our customers.

**Titre:**  
3.3 - 135 dtex

**Cut Length:**  
40 - 90mm

**Crimp:**  
0.5 - 5.00 crimps/cm

**Tenacity:**  
min.28cN/tex

**Elongation:**  
60 - 120%

**Applications:**  
Automotive, Floor  
Coverings, Construction,  
Technical

<b>Form of supply:</b>	Staple fibres
<b>Packaging:</b>	Bales

Special demands on certain properties need to be discussed.

Sustainability is imperative to our future, and we have a responsibility to ensure our company, products and customers can contribute as much as possible. Our progressive R&D line investment allows IFG to develop more environmentally friendly, sustainable fibres, recycled polymers and be committed to future advancements in technology.
